Express Scripts may contact your doctor about your prescriptions

If you are prescribed a drug that is not on your health plan's preferred list, yet an alternative plan-preferred drug exists, we may contact your doctor to ask whether that drug would be appropriate for you. If your doctor agrees to use a plan-preferred drug, you will usually pay less.

For short-term prescriptions, such as antibiotics, use a participating retail pharmacy

Prior authorization: When is a coverage review necessary?

Some medications are not covered unless you first receive approval through a coverage review (prior authorization). This review uses plan rules based on FDA-approved prescribing and safety information, clinical guidelines and uses that are considered reasonable, safe and effective.

There are other medications that may be covered, but with limits (for example, only for a certain amount or for certain uses), unless you receive approval through a coverage review. During this review, Express Scripts asks your doctor for more information than what is on the prescription before the medication may be covered under your plan. To find out whether a medication requires a coverage review, sign in at Express-Scripts.com and select “Price a Medication” from the drop-down menu under “Manage Prescriptions”. After looking up the medication’s name, click “View coverage notes” to see coverage details.
